

# GULFSTREAM G-550

## WHEN THE WORLD IS YOUR OFFICE

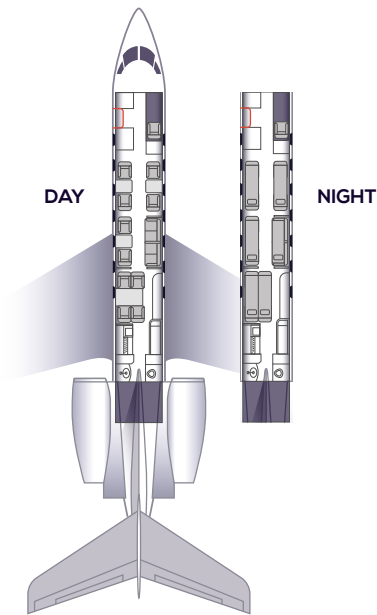

Designed for ultra-long range flights, the Gulfstream G-550 is the ultimate business jet. The aircraft can fly up to 6,700 nm (12,500 km) with an average cruising speed of Mach 0.85. We will fly you directly to your actual destination and not via several hub airports.

The Gulfstream can seat 14 passengers or sleep 7 in full length beds. On all of our flights a full cabin service including hot meals will be offered and served by one of our team of fully experienced and discreet cabin crew.

With an equivalent cabin altitude of only 4,000 feet when cruising well above airliner traffic and with a complete air change every 2.5 minutes, the cabin is the most environment-friendly available in the business, helping you arrive completely refreshed after a long-haul flight.

In collaboration with Medicare, we are equipped to provide medical assistance and equipment for airborne emergencies.

*We guarantee our clients absolute personal discretion, reliability and flexibility – all delivered with you in mind.*
